

# GET THE JOB DONE WITH BM 2700

IT'S STRAIGHTFORWARD

**BORUM**

## READY – SET – GO MARKING!

With the LineMaster computer you can pre-set line types, line widths and combinations of lines- and simply adjust on the go.

This is all you need to make the line marking straight, precise and meet the specifications of your line marking contract.

The LineMaster is a straightforward tool for controlling all line marking tasks and easy for the operator to use.

## ALL THE POWER YOU NEED

The electrical system operates at 24V and using the available auxiliary box, you can customize with your own extra equipment such as signs, extra work lights and more.

Work lights and taillights on the machine are LED type providing good visibility.

The high quality mobile controller, ensures reliable performance and makes it simple to troubleshoot any errors that may occur.

## SEE THE STATUS OF THE MACHINE

All important machine functions are shown on the screen of the MachineMaster.

Sensors on the engine, compressor, hydraulic and electrical systems conveniently follow the condition of the machine so you can act accordingly. Hereby downtime and costs are kept to a minimum.

## A STRAIGHTFORWARD MACHINE

Change of filters for fuel, hydraulics and the compressor is user-friendly, and a special solution prevents spill when changing engine and compressor oil.

Refueling of diesel can be done from both sides of the machine and for tax purposes you can choose separate meters on the two fuel tanks.

The bead tank is divided and can hold two types of beads/friction material.

*"IT IS WELL DESIGNED WITH HIGH-GRADE COMPONENTS, AND IT'S QUITE SILENT. ALL IN ALL, EXCELLENT QUALITY!"*

Markierung NF- Germany

## **A POWERFUL HIGH-PERFORMANCE ROAD MARKING MACHINE**

Do you need a compact and yet powerful machine for urban and interurban line marking jobs? Look no further- the BM 2700 is here!

### **ENJOY COMFORTABLE DRIVING**

Driving the BM 2700 is smooth and comfortable! Regardless of terrain, or if the machine is fully loaded or empty, the BM 2700 will give you a steady ride, due to a high torque available at low RPM.

The intake regulated compressor, RPM-controlled fans and the insulation of the engine room, ensure that noise from the machine is kept to a minimum.

### **A MACHINE FOR ALL KINDS OF JOBS**

With a small turning radius of only 3,45 m, the maneuverability is excellent for line marking work in the city, but the material capacity also allows for interurban marking jobs. Application equipment is fitted according to your request.

Its large cooling capacity allows it to effectively operate in hot environments.

### **ENVIRONMENTALLY FRIENDLY**

The BM 2700 complies with the EU stage V emission regulations.

**BORUM A/S** - a global leading supplier of robust and high quality line marking machines. Having decades of experience and machines active in more than **100** countries, we believe in delivering reliable and easy-to-operate equipment that ensure high-quality line markings, efficient application and maximum uptime.
